# 3M Dynatel 965AMS Specs Provided by www.AAATesters.com

# **3M Dynatel**™ Advanced Modular System 965AMS

**Future-Proof Testing Platform** 

## THE 3M" DYNATEL" ADVANCED MODULAR SYSTEM 965AMS. WHATEVER THE TECHNOLOGY, WE'VE GOT THE TESTER.

The new Dynatel 965AMS system contains every feature of our previous 965 model plus a larger, brighter display that features 3M™ Vikuiti™ Display Enhancement technology, a user-friendly icon-based interface and rugged field-swappable modules.\* These external modules can be shared between technicians and allow transmission testing of a variety of OSP technologies. The platform is available with an optional ADSL2+ modem module, and in the future, will also feature additional modules, such as: VDSL2,

FTTx fiber test, VoIP and new technologies yet to come.

\*Except for ISDN modem test

3M Dynatel Advanced Modular System 965AMS

#### **FEATURES AND BENEFITS**

Communications	Capability to work with a PC or handheld computer supporting software upload and data downloads
Flexible architecture	Supports various data modem protocols such as ADSL2+
Graphical user interface	User-friendly, icon-based display of test results
Help function	An internal help and tutorial provides information as needed during operation
Backlight	High resolution/high contrast black and white LCD display
Vehicle power adapter	Plugs into standard vehicle accessory outlet
Windows/CE operating system	Provides open architecture software environment
Keyboard	Allows rapid access to twelve different "blue key" functions, reducing menu levels. Also has cursors, and supports alpha-numeric entry
Yellow and green LED lights	Signal battery state and communication status
Software	TDR and autotest knowledge based systems aids technicians during test interpretation
Bright big screen	Highly visible even in bright sunlight due to proprietary 3M™ Vikuiti™ brightness enhancement technology; 80% larger than 965DSP
Modular design	All you need is a new module to increase test capability (no need to replace test set)
Dynatel yellow	Rugged, dependable

# THE COMPLETE TESTING PLATFORM FOR ALL OUTSIDE PLANT TELECOMMUNICATIONS

This microcomputer-controlled flexible test set family provides full-featured testing for the triple play—voice, video and data circuits. Because it's a Dynatel 965 series tester, the AMS model is easy to use, requiring minimal training for testing professionals. And because it emphasizes fault diagnosis and fault location, customer problems can be solved quickly.

## **AUTOTEST**

The knowledge-based smart autotest function is the product of more than a hundred years of Dynatel team experience. It allows an automatic test of active and inactive lines with pass/fail limits. Autotest capabilities also include expert system analysis of test results with advice on how to repair or how to locate faults. 3M™ Dynatel™ Far End Device FED II and customizable selections of tests are supported by the autotest feature of the 965AMS platform.

#### **EXTERNAL MODULES**

The 3M™ Dynatel™ Advanced Modular System 965AMS modules are field swappable, testing the exact digital transmission modem needed for each job. The module supports special circuits technicians who work on a variety of circuit standards during a typical day. Because the modules are field swappable, the technicians can share them. So it's no longer necessary to buy a separate testing platform for each set of modules. The ADSL2+ module is currently available. The following is a list of future modem protocols: VDSL2, FTTx fiber test and VoIP.

## **RUGGED, WEATHER-RESISTANT DESIGN**

The hand-held 965AMS product is housed in a lightweight, ergonomically-designed case for portability and ease of handling. The unit is weather-resistant and weighs only 5 lbs (2.2kg). The unit operates on a desktop, on the ground, up in an aerial environment and in underground locations.

The Dynatel brand and the distinctive Dynatel yellow case are your assurance of rugged dependability.

## **ACCESSORIES**

PRODUCT NAME	DESCRIPTION
Test leads	Five 5-ft (1.5 m) test leads with 2 mm gold-plated banana plugs one end and chrome-plated alligator clips on other end (black/red, blue/yellow, green) Lead styles include bed of nails, no nails, spike and Canadian test leads
European test leads	Five 5-ft (1.5 m) test leads with 2 mm gold-plated banana plugs one end and 4-mm gold-plated banana plugs on other end (black/red, blue/yellow, green)
RFL strap	1.5 ft (0.5 m) with alligator clips on ends
AC/DC adapter	100-250 VAC (50/60 Hz) input, 12 VDC (1 A) output Power cord with IEC socket, US cord included

#### **ENVIRONMENTAL SPECIFICATIONS**

Operating temperature	0° to 140°F (-18 to 60°C)	
Storage temperature	-40° to 165°F (-40 to 75°C)	
Moisture: rain, water and humidity proof	Meets or exceeds IP65, IP67	

#### **PHYSICAL SPECIFICATIONS**

	SIZE (H X W X D) IN. (CM)	WEIGHT (INCLUDING BATTERIES)
965AMS (includes ADSL2+ module)	11.5 x 5.75 x 3.25 (29 x 14.5 x 8.3)	5 LB (2.2 KG)

## **ELECTRICAL SPECIFICATIONS**

FUNCTIONS	RANGE	RESOLUTION	ACCURACY
Voltage (DC)	0 to 99.9 V 100 to 300 V	0.1 V 1 V	1% ± 0.5 V 3%
Voltage (AC) Meter resistance 100 k or 1 m	0 to 99.9 V 100 to 250 V	0.1 V 1 V	1% ± 0.5 V 3%
Current Shunt resistance	0 to 59.9 mA 60 to 110 mA 430 $\Omega$	0.1 mA 0.1 mA	1% ± 0.3 mA 2%

## **ELECTRICAL SPECIFICATIONS**

RANGE	
300 Hz – 3400 Hz	
1 kHz – 50 kHz	
4.9 kHz – 245 kHz	
20 kHz – 1.1 MHz – 3 dB points	
20 kHz – 2.2 MHz	
	300 Hz – 3400 Hz 1 kHz – 50 kHz 4.9 kHz – 245 kHz 20 kHz – 1.1 MHz – 3 dB points

## **GENERAL SPECIFICATIONS**

Drop test	Survives 3 ft (1 m) drop onto concrete, (survives 5 ft drop onto concrete with soft case) using ASTM D4169 assurance level I method 5276
Vibration	Meets Mil 810F method 514.5
Water, dust and chemical proof	Meets IP65 per IEC 529(1989) for rain and dust Immersion test IP67 0.15 m deep
Emissions	Standards meet FCC part 15, class A: Digital Devices for the US, and EN55022 (radiated emissions)
Built to ISO9001/2000 certification for manufacturing facilities and TL 9000 compliant	
Built to ANSI/IPC A610-C manufacturing standards	
Language	English, Spanish, and French Canadian*
Units	Feet or meters, Fahrenheit or Celsius, dBrnC or dBm0p, m/uS or Vp
Battery	Rechargeable battery pack or alkaline, 9 hours typical use (50% on/off measures voltage)
Display	4.1" x 3.1"(104 x 79 mm), 320 x 240 pixel resolution, high visibility in bright sunlight due to 3M™ Vikuiti™ film technology
Stored results (All Results)	100 results total of all types maximum

 $\textbf{Note:} \ \ \textbf{Routine lab calibration is not recommended or required}$

Ground resistance Measures the resistance of the ground path  ID tone High power interrupted signal for tracing and identification  Kick test Rapid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs  Voice band tests Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility  Load coil count Indicates the presence of load coils in a loop circuit and distance to the first load coil  Loss Measures voiceband loss Noise Measures and displays the impedance of the un-terminated line as a function of frequency  Tone Provides active measurement of line balance  Level trace Measures and displays the impedance of the un-terminated line as a function of frequency  Tone Provides to tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest Supports 3M* Dynatel* Far End Device FED II  Dialing Offhook, dialing capability, monitoring capability Microphone and speaker capability	Current	Measures DC loop current with a 430-ohm shunt
expose corrosion-induced faults  Locates opens at distances up to 100,000 ft. (30 km)  Resistive fault location  Displays distance to fault  Special resistance  Measures the loop resistance and the resistance difference between two conductors on a pair  Wet section test  Allows RFL measurement when both wires in a pair are faulted and there is no separate good pair available  Ringers  Measures and displays capacitance asociated with one or more ringers and the equivalent count.  Ground resistance  Measures the resistance of the ground path  ID tone  High power interrupted signal for tracing and identification  Kick test  Papid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs  Voice band tests  Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility  Indicates the presence of load coils in a loop circuit and distance to the first load coil  Loss  Measures voiceband loss  Measures voiceband loss  Noise  Measures noise metallic and noise to ground in dBrnC or dBmOp  Longitudinal balance  Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest  Supports 3M* Dynatel* Far End Device FED II  Dialing  Offhook, dialing capability, monitoring capability  Microphone and speaker capability	Resistance	Measures conductor and insulation resistance up to 1GigaOhms
Resistive fault location  Displays distance to fault  Measures the top resistance and the resistance difference between two conductors on a pair  Wet section test  Allows RFL measurement when both wires in a pair are faulted and there is no separate good pair available  Ringers  Measures and displays capacitance associated with one or more ringers and the equivalent count.  Ground resistance  Measures the resistance of the ground path  High power interrupted signal for tracing and identification  Kick test  Rapid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs  Voice band tests  Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility  Load coil count  Indicates the presence of load coils in a loop circuit and distance to the first load coil  Loss  Measures voiceband loss  Measures noise metallic and noise to ground in dBrnC or dBmOp  Longitudinal balance  Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Supports 3M** Dynatei** Far End Device FED II  Dialing  Offhook, dialing capability, monitoring capability  Microphone and speaker capability	Soak test	
Special resistance difference between two conductors on a pair  Wet section test Allows RFL measurement when both wires in a pair are faulted and there is no separate good pair available.  Ringers Measures and displays capacitance associated with one or more ringers and the equivalent count.  Ground resistance Measures the resistance of the ground path  ID tone High power interrupted signal for tracing and identification  Kick test Rapid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs  Voice band tests Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility  Load coil count Indicates the presence of load coils in a loop circuit and distance to the first load coil  Loss Measures voiceband loss  Noise Measures noise metallic and noise to ground in dBrnC or dBm0p  Longitudinal balance Provides active measurement of line balance  Level trace Measures and displays the impedance of the un-terminated line as a function of frequency  Tone Provides test tones for conductor identification and transmission testing, 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 10000 Hz  Autotest Supports 3M* Dynatel* Far End Device FED II  Dialing Offhook, dialing capability, monitoring capability  Microphone and speaker capability	Opens	Locates opens at distances up to 100,000 ft. (30 km)
Met section test Allows RFL measurement when both wires in a pair are faulted and there is no separate good pair available Ringers Measures and displays capacitance associated with one or more ringers and the equivalent count. Ground resistance Measures and the equivalent count.  Ground resistance Measures the resistance of the ground path ID tone High power interrupted signal for tracing and identification Kick test Rapid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs  Voice band tests Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility Load coil count Indicates the presence of load coils in a loop circuit and distance to the first load coil Loss Measures voiceband loss Noise Measures noise metallic and noise to ground in dBrnC or dBmOp Longitudinal balance Level trace Measures and displays the impedance of the un-terminated line as a function of frequency Tone Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest Supports 3M* Dynatel* Far End Device FED II Dialing Offhook, dialing capability, monitoring capability Microphone and speaker capability	Resistive fault location	Displays distance to fault
And there is no separate good pair available  Measures and displays capacitance associated with one or more ringers and the equivalent count.  Ground resistance  Measures the resistance of the ground path  ID tone  High power interrupted signal for tracing and identification  Kick test  Rapid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs  Voice band tests  Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility  Indicates the presence of load coils in a loop circuit and distance to the first load coil  Loss  Measures voiceband loss  Noise  Measures voiceband loss  Noise  Measures noise metallic and noise to ground in dBrnC or dBm0p  Longitudinal balance  Provides active measurement of line balance  Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides test tones for conductor identification and transmission testing, 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest  Supports 3M* Dynatel* Far End Device FED II  Dialing  Offhook, dialing capability, monitoring capability  Microphone and speaker capability  Speaker has 1-watt power output for noisy environments	Special resistance	
more ringers and the equivalent count.  Ground resistance Measures the resistance of the ground path  ID tone High power interrupted signal for tracing and identification  Kick test Rapid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs  Voice band tests Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility  Load coil count Indicates the presence of load coils in a loop circuit and distance to the first load coil  Loss Measures voiceband loss  Noise Measures noise metallic and noise to ground in dBrnC or dBm0p  Longitudinal balance Provides active measurement of line balance  Level trace Measures and displays the impedance of the un-terminated line as a function of frequency  Tone Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest Supports 3M" Dynatel" Far End Device FED II  Dialing Offhook, dialing capability, monitoring capability  Microphone and speaker capability Speaker has 1-watt power output for noisy environments	Wet section test	
ID tone  High power interrupted signal for tracing and identification  Kick test  Rapid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs  Voice band tests  Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility  Indicates the presence of load coils in a loop circuit and distance to the first load coil  Loss  Measures voiceband loss  Noise  Measures noise metallic and noise to ground in dBrnC or dBmOp  Longitudinal balance  Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest  Supports 3M** Dynatel** Far End Device FED II  Dialing  Offhook, dialing capability, monitoring capability  Microphone and speaker capability  Speaker has 1-watt power output for noisy environments	Ringers	
Rapid, fast combination of resistance, voltage and opens for quickly evaluating cable pairs  Voice band tests  Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility  Indicates the presence of load coils in a loop circuit and distance to the first load coil  Loss  Measures voiceband loss  Noise  Measures noise metallic and noise to ground in dBrnC or dBm0p  Longitudinal balance  Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides active measurement of line balance  Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest  Supports 3M** Dynatel** Far End Device FED II  Dialing  Offhook, dialing capability, monitoring capability  Microphone and speaker capability	Ground resistance	Measures the resistance of the ground path
Voice band tests  Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility  Indicates the presence of load coils in a loop circuit and distance to the first load coil  Loss  Measures voiceband loss  Noise  Measures noise metallic and noise to ground in dBrnC or dBm0p  Longitudinal balance  Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest  Supports 3M** Dynatel** Far End Device FED II  Dialing  Microphone and speaker capability  Speaker has 1-watt power output for noisy environments	ID tone	High power interrupted signal for tracing and identification
Load coil count  Indicates the presence of load coils in a loop circuit and distance to the first load coil  Loss  Measures voiceband loss  Noise  Measures noise metallic and noise to ground in dBrnC or dBm0p  Longitudinal balance  Provides active measurement of line balance  Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest  Supports 3M** Dynatel** Far End Device FED II  Dialing  Offhook, dialing capability, monitoring capability  Microphone and speaker capability  Speaker has 1-watt power output for noisy environments	Kick test	• • • • • • • • • • • • • • • • • • • •
and distance to the first load coil  Loss  Measures voiceband loss  Noise  Measures noise metallic and noise to ground in dBrnC or dBm0p  Longitudinal balance  Provides active measurement of line balance  Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest  Supports 3M™ Dynatel™ Far End Device FED II  Dialing  Offhook, dialing capability, monitoring capability  Microphone and speaker capability  Speaker has 1-watt power output for noisy environments	Voice band tests	Noise, loss, tone, longitudinal balance, load coil counting and FED compatibility
Noise  Measures noise metallic and noise to ground in dBrnC or dBm0p  Longitudinal balance  Provides active measurement of line balance  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest  Supports 3M <sup>™</sup> Dynatel <sup>™</sup> Far End Device FED II  Dialing  Offhook, dialing capability, monitoring capability  Microphone and speaker capability  Speaker has 1-watt power output for noisy environments	Load coil count	
Longitudinal balance  Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest  Supports 3M** Dynatel** Far End Device FED II  Dialing  Offhook, dialing capability, monitoring capability  Microphone and speaker capability  Speaker has 1-watt power output for noisy environments	Loss	Measures voiceband loss
Level trace  Measures and displays the impedance of the un-terminated line as a function of frequency  Tone  Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest  Supports 3M** Dynatel** Far End Device FED II  Dialing  Offhook, dialing capability, monitoring capability  Microphone and speaker capability  Speaker has 1-watt power output for noisy environments	Noise	Measures noise metallic and noise to ground in dBrnC or dBm0p
Tone Provides test tones for conductor identification and transmission testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest Supports 3M <sup>™</sup> Dynatel <sup>™</sup> Far End Device FED II  Dialing Offhook, dialing capability, monitoring capability Microphone and speaker capability Speaker has 1-watt power output for noisy environments	Longitudinal balance	Provides active measurement of line balance
testing. 10 default tones, user selectable. Voiceband to 20 kHz, ID tones to 1000 Hz  Autotest Supports 3M" Dynatel" Far End Device FED II  Dialing Offhook, dialing capability, monitoring capability  Microphone and speaker capability Speaker has 1-watt power output for noisy environments	Level trace	·
Dialing Offhook, dialing capability, monitoring capability  Microphone and speaker capability Speaker has 1-watt power output for noisy environments	Tone	testing. 10 default tones, user selectable. Voiceband to 20 kHz,
Microphone and speaker capability  Speaker has 1-watt power output for noisy environments	Autotest	Supports 3M™ Dynatel™ Far End Device FED II
	Dialing	Offhook, dialing capability, monitoring capability
Caller ID functionality Displays number, name, date, and time just like the customers callbox	Microphone and speaker capability	Speaker has 1-watt power output for noisy environments
	Caller ID functionality	Displays number, name, date, and time just like the customers callbox

#### **FEATURES**

Wideband shortrange testing	Wideband loss with limited range, wideband tone. This feature set is enabled in the basic and TDR units. Wideband loss measurements for short range or low frequency
Test impedance	135 ohms only
Tone	20kHz to 1.2MHz at 0dBm

#### **OPTIONAL FEATURES**

TDR	Full-featured TDR with user-selectable pulse widths, length, gain zoom, filter and Vp. The TDR feature is enabled in the TDR and SA models
Single trace	Provides graphical representation of events on a pair. Including expert system analysis of trace results
Dual trace	Allows active comparison of two traces
Differential	Displays difference between two circuits
Crosstalk	Displays the crosstalk from one pair to another
Memory	Allows comparison of an active trace with a trace stored in memory
Memory diff	Difference between memory and live trace
Peak	Displays a history of maximum and minimum values with the live trace
WideBand tests	Wideband loss, wideband noise, wideband tone, Spectrum Analyzer this feature set is enabled in the SA models
WideBand	Continuous sine wave insertion loss and noise measurements
Test impedances	100 and 135
Wideband loss	Loss measurements to 2.2 MHz for pre-qualifying xDSL
Tone	20kHz to 2.2 MHz at 0dBm
E, F, G, G2 filter	Weighted noise and impulse noise counting

Available soon. To order, call 800/426 8688 and specify the appropriate 965AMS with optional ADSL2+ modem. The platform includes the NiMH battery pack, AC Adapter, AC power cord, test leads, alkaline battery holder, conductor strap and user's guide. You may order the ADSL2+ modem and 3M™ Dynatel™ Far End Device FED accessory for the 965AMS separately. For further information, please contact your local 3M representative or visit our website at http://www.3M.com/dynatel for more details.

## **ORDERING INFORMATION**

PRODUCT NUMBER	STOCK NUMBER
965AMS-TDR/SA/ADSL2+/AC/DC/BON	80-6113-1614-4
965AMS-TDR/SA/ADSL2+/AC/DC/NN	80-6113-1660-7

## **KIT COMPONENTS**

965AMS BASIC	DESCRIPTION
965AMS Basic	965AMS base unit, storage bag, blue, yellow, green, red and black test leads.
	Conductor strap, NiMH battery pack (packed in unit), alkaline battery holder,
	wire gauge, self test circuit board and chain bead, 110/220V AC adapter,
	certificate of calibration, vehicle power adapter, instruction manual, warranty
	card, quick reference card, USB cable, and ethernet cable (with ADSL2 options)

The full-service 3M repair facility can help you with any spare part needs. Contact the 3M
repair center at 800/426 8688, or online at www.3MRepair.com.
