Hot Jacket Strippers

The HJS-02, HJS-03 and HJS-03-24 hot jacket strippers provide superior ribbon and field-ribbonized stripping performance. They conserve energy with a Power Save feature when the splicer is operated by battery power. A temperature selection switch provides easy field optimization for different fibers or operating conditions. An optional single-fiber adapter may be used to provide easy single-fiber capability for difficult-to-strip fibers. These strippers accept all Fujikura field and factory splicer designed fiber holders. The HJS-03 is a battery powered hot jacket stripper specifically designed for use with the SpliceMate fusion splicer but it can be used in other applications. The HJS-03-24 hot jacket stripper is designed for smooth and controlled stripping of 24-fiber ribbon.
