

1X12 OPTICAL SWITCH MODULE

FTB-9100

NETWORK TESTING

Multiply Speed and Power

Multiply your measurement power by achieving highly accurate, repeatable fiber-to-fiber switching with the FTB-9100 Optical Switch. Combine the FTB-9100 Optical Switch, an OTDR module and EXFO's advanced FTB-400 Universal Test System, to automatically perform single- or dual-wavelength OTDR acquisitions on up to 12 fibers.

Stop Waiting, Start Testing

The optical switch module performs reliable one-stop batch fiber testing or ribbon-fiber testing by switching between one common port and 12 input/output ports. Choose from three output connector types: MTP (ribbon), SC or E-2000. With only one connection to handle, the MTP connector and patchcord configuration cuts setup time and speeds up testing.

Get Ahead on High-Volume Acquisitions

Efficient software is essential for realizing productivity goals. ToolBox OTDR software automatically delivers accurate, high-volume testing. Simply press the Start button and let the FTB-9100 Optical Switch direct the OTDR signal from one fiber to another. ToolBox OTDR software automatically acquires and stores test data, then generates an integrated result table based on Pass/Fail thresholds.
