Hand-Held Fusion Splicer

SI23C ver.2 NEW Features

The S123C Hand-Held Clad-Alignment Fusion Splicer has been enhanced and updated to version 2. The battery is automatically charged internally when connected to AC mains power even during operation. The new illumination lamp lights up a wide area around the V-grooves and helps operation in low light environment. The redesigned and strengthened heater simplifies the protection sleeve loading process. Splicing Drop/Indoor cable is possible with newly designed kits.

Features and Applications

With its low profile design and light weight body the S123C offers single fiber splicing with outstanding mobility and extreme ease-of-use. In addition, the rugged body is designed to endure harsh operating conditions by improving shock/impact resistance with rubber pads embedded on 4 corners of the splicer body. It achieves water resistance compliant IPX2 and dust resistance compliant IP5X.

The fast 13 seconds splice time and 25 seconds protection sleeve shrink time offers a highly efficient work environment. Large battery capacity makes it possible to perform 70 cycles of splicing and heating, while it offers SOC solution as well.

By combining portability, ease of use, improved speed and durability, the S123C becomes an excellent option for use in the conventional telecommunications industry.

FURUKAWA ELECTRIC

Key Features

Internal battery charging

- Illumination lamp lights up a wide area around V-grooves
- IP-52 Rugged and compact hand held design for demanding environmental conditions
- Fast splice (13 sec) at low loss and Fast Heating (25 sec) for single fiber*1
- Simple operation with Fixed V-groove
- Splicer is compatible with the Seikoh Giken and Diamond Spliceon-connector (SOC)
- 70 cycles (Splicing & Heating) ^{*2}
- Available for All METRO/LAN/FTTx fibers including ultra bend-insensitive fibers (e.g. EZ-Bend)
- Easy maintenance Toolless electrode replacement/mirror free alignment system
- · Easy Software upgrade via the Internet
- Easily exchanged fiber holder systems (tight holder/fiber holder/SOC holder)
- Splicing Drop/Indoor cable is available
- PC interface software to allow user manage splicing programs and results
- Auto-start shrink sleeve oven feature
- Improved GUI to further enhance ease-of-use
 - RoHS compliant
 - *1 By using semi-auto mode for splicing and pre-heating mode for heating.
 - *2 By using semi-auto mode for splicing and regular mode for heating.

Under Tough Environment

S123C passed criteria as below *3

Drop Resistance 76 cm drops from 5 different angles

Water Resistance

Dust Resistance

- *3 Above tests were performed at Furukawa Electric Labs, and do not guarantee that the machine will be undamaged under these conditions.
- *4 IPX2 rating drip proof means that the machine can be exposed to 3 mm/min drip from 4 different angles with 15° tilt for 2.5 min each and still functions.
- *5 IP5X rating dust proof means that the machine can be exposed to dust particles with a diameter of 0.1 to 25 μm for 8 hours and still functions.

SPECIFICATIONS

| Applicable Fibers | SM (ITU-T G.652), MM (ITU-T G.651), DSF (ITU-T G.653), NZD (ITU-T G655), BIF/UBIF (Bend Insensitive Fiber ITU-T G.657) | |
|---------------------------|---|--|
| Cladding Diameter | 125 µm | |
| Coating Diameter | 250 to 900 µm | |
| Fibers Cleave Length | 5 to 10 mm or 16 mm | |
| Average Splice Loss | SM: 0.05 dB, MM: 0.02 dB, DSF 0.08 dB, NZD 0.08 dB | |
| Splice Time | 13 seconds | |
| Heat Time | 25 seconds *6 (S922: 40 mm sleeve, S921: 60 mm sleeve) (Pre-heat mode) 31 seconds *6 (S922: 40 mm sleeve, S921: 60 mm sleeve) (Regular mode) | |
| Splice Programs | Max. 150 | |
| Heat Programs | Max. 18 | |
| Automatic Heating Start | Available | |
| Applicable Sleeves | 20/40/60 mm | |
| Fiber Holding | Tight holder (Loose tube applicable) or Removal fiber holder system | |
| Tension Test | 1.96 N | |
| Return Loss of Splice | 60 dB or more | |
| Fiber Image Magnification | 58X | |
| Splice Memory | Max. 1500 | |
| Image Capture Capacity | Last 100 images to be automatically captured + Up to 24 images to be stored permanently | |
| Dimension | $127W \times 199D \times 81H$ mm (not including shock absorber) $159W \times 231D \times 104H$ mm (including shock absorber) | |
| Weight | 1.4 kg (without battery), 1.6 kg (with battery) | |
| Monitor | 3.5" color LCD monitor | |
| Data Output | USB ver. 2.0 mini | |
| Battery Capacity*7 | Typical 70 splice/heat cycles with S943B battery | |
| Wind Protection | Max. wind velocity of 15 m/s. | |
| Operating Temperature | -10 to 50°C (without excessive humidity) | |
| Storage Temperature | -40 to 60°C (without excessive humidity) | |
| Humidity | 0 to 95% RH (non-condensing) | |
| Power Source | AC input 100 to 240 V (50/60 Hz), DC Input 11 to 17 V without any change of hardware | |

*6 The first heating after turning on the power can be longer than usual heating time.
*7 The number of the splicing and heating the machine can produce using a full charged battery at room temperature of 20°C, semi-auto mode for splicing and regular mode for heating. Depending on the condition of the battery and the operation environment, the number can vary.
