

FLIR E-series bx

The E40bx, E50bx and E60bx, with MSX® advanced thermal imaging camera performance

Get more IR inspections done, create professional detailed reports easier, and share images and findings faster with FLIR's E-Series bx thermal imagers. Featuring a fresh array of imaging, communication, and productivity tools to help you take care of more customers.

FLIR Tools Mobile communication – Connect an E-Series bx camera to smartphones and tablets with our Wi-Fi app. Stream live video so customers can watch along. Import radiometric JPEGs, adjust levels and color, add measurement tools, then send images off in simple reports via email to get a faster yes for repairs.

Superior thermal imaging – Up to 76,800 pixels (320 x 240) for better long-range accuracy and the highest level of point & shoot camera IR resolution.

MSX thermal image enhancement – See structural features, numbers, and other key visual details not normally apparent in a regular thermal image with an all-in-one thermal picture that instantly orients you to right where heat issues are.

Onboard digital camera – 3.1MP resolution provides clear visible light reference pictures; includes built-in LED lamp that doubles as a flashlight plus a laser pointer to mark locations.

Large touchscreen with auto-orientation – The E-Series touchscreen provides an intuitive interface that takes full advantage of the entire 3.5" display for easy access to diagnostics tools – now with auto-orientation to keep measurement and other data overlays upright no matter how you hold the camera.

Picture-in-Picture – Overlay thermal images onto digital scenes for extra location documentation.

Multiple measurements – Add up to 3 box areas and 3 moveable spots using the touchscreen to gather more detailed temperature information

MeterLink® – Measure more than temperature. Send diagnostics data by Bluetooth from compatible clamp and moisture meters directly to E-Series bx cameras to embed extra information into thermal images as you capture them that further supports findings.

Interchangeable lenses and manual focus – Optional wide-angle and telephoto optics let you capture more of a scene in one shot or get in closer to measure smaller, distant targets. Full focus control help you dial in the sharpest clarity and accuracy.

Greater temperature sensitivity – See subtler temperature patterns and detail with 0.045°C sensitivity.

FLIR Tools Mobile Wi-Fi connectivity

Large 3.5" touchscreen

Auto-orientation keeps diagnostics overlays upright

Visible light pictures align with thermal images: 3.1MP digital camera, LED lamp, and laser pointer

Large buttons for easy glove-handed operation

MSX Image enhancement

Bluetooth® METERLiNK® communication

Applications

Missing insulation - Solar cell failure - moisture intrusion

Radiant heat tubing - cold draft - air infiltration
