Fluke 572CF Specs Provided by www.AAATesters.com

Fluke 572, 574 and 574-NI Infrared Thermometers

Non-contact temperature measurement

Technical Data

When the job demands precision and accuracy

Broad temperature range, superior optics and the advanced extra-bright three-dot laser sighting system make Fluke 570 series thermometers the most advanced portable thermometers in the industry.

Preventive Maintenance

Electrical

574-NI Nonincendive Model

When safety is a concern and data logging and downloading are required, the Fluke 574 Nonincendive (NI) model thermometer is the product to choose. It has the same great features as the standard 574 model thermometers with the extra confidence of a Factory Mutual approval for use in hazardous environments*. The Fluke 574–NI thermometer,

does not to release enough electrical or thermal energy to ignite flammable gases or vapors under normal operational and environmental conditions.

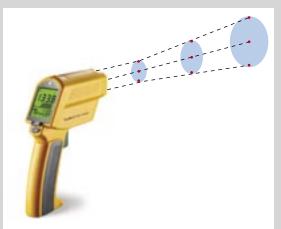

*See specification table for details.

Advanced Display

- 100-point onboard temperature data logging capability
- 30 preset common material emissivity values
- Adjustable emissivity values (0.01 increments)
- Customizable log names, alarms, and emissivity

Advanced Sighting

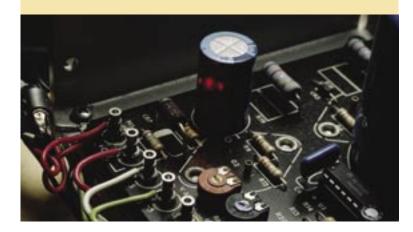

Accurate measurements depend in part on accurately sighting a target. Fluke 570 series thermometers are the only thermometers with a sighting system designed to precisely track the infrared path as seen by the sensors. This enables the advanced coaxial three-dot laser sighting to accurately show both the center and the edges of the spot being measured, regardless of the thermometer's distance from the target.

This laser sighting also appears twice as bright to the human eye as normal lasers (while maintaining the same safety rating as less bright lasers), making precise sighting easier in a variety of lighting conditions and distances.

Close Focus Option

The Close Focus (CF) option lets you accurately measure very small areas at the focus point – where the IR beam narrows. Paired with the advanced coaxial laser sighting system, extremely small objects 6 mm (0.24 in) at 300 mm (11.4 in) can be easily measured. Ideal for electrical maintenance and refrigeration troubleshooting.

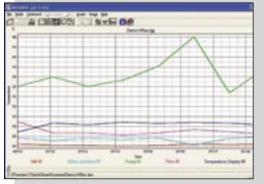

Software for Condition Monitoring and Process Control

Visualize, systematically maintain and analyze temperature data using Windows[®] compatible software and a Fluke 574 or 574-NI IR thermometer.

Easily see temperature trends and potential equipment problems by graphing data accumulated with the unit's data logging feature.

The software

makes it easy to error-proof

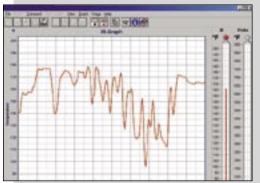

inspection routes

by giving names,

alarm points and emissivities to

locations.

The 574 can be used to monitor, graph, and record real-time temperature changes with the software.

Export Format " Flowing paint format S Replachment Time mode Depresal digits for electeds 2 1 W Abarbia F Loading Zen C Rolotive to hoster Of Show date P Show time Duno entrer 17 24 His.m. # day/mont/vyoar Out-sites month/dep/year Tena 8 Tana (Sec mush) C vetalitize/month Date / Term # State C yearing and billion CEat

The software provides a convenient way to export temperature data files in a format that can be used by programs such as Access[®], Excel[®], and condition monitoring programs.

Graph

- Visually review data and spot trends instantly through graphs
- Simultaneously graph results while continuously monitoring temperatures
- Quickly compare temperatures of up to five log locations for trends or anomalies
- Display infrared and/or probe temperature trends over time
- View infrared and probe values continuously on thermometer sidebar

Data log

- Create recognizable names for inspection locations
- Track both infrared and probe temperature trends
- Tailor high/low alarms per individual inspection location
- View min, max, and average infrared and probe temperatures
- Create and customize emissivity tables for each inspection location
- Store up to 10,000 data points in a file

Reporting and documentation

- Customize report views and printing formats
- Generate time and datestamp printouts for accurate records
- Export data as text files for integration with Maintenance, Repair and Operations (MRO) systems and other database programs

Ordering Information

Options

- (all models)
- Close focus*
- NIST calibration certification
- * Not available with 574-NI

Options

(574 and 574-NI)

• mV/degree output cable

Accessories

(all models)

• Padded pouch with belt clip

Accessories

(574 and 574-NI)

- PC software
- RS232 computer cable
- Plug-in power supply
- Thermocouple K probe

(Power supply and cable not approved by FM for use in hazardous locations)

Included with the Fluke 572 and 574 units:

- User's guide on CD
- Hardshell carrying case.

Fluke. Keeping your world up and running.
