Agilent 8565EC Specs Provided by www.AAATesters.com

Agilent 8560 EC Series Spectrum Analyzers Data Sheet

Agilent 8560EC 30 Hz to 2.9 GHz Agilent 8561EC 30 Hz to 6.5 GHz ¹ Agilent 8562EC 30 Hz to 13.2 GHz Agilent 8563EC 30 Hz to 26.5 GHz Agilent 8564EC 30 Hz to 40 GHz Agilent 8565EC 30 Hz to 50 GHz

1. The 8561EC has been discontinued and replaced with 8562EC.

The Agilent 8560 EC Series spectrum analyzers have a color display, offer standard digitized fast time domain sweeps (Option 856xE-007 on the 8560 E Series), and are Class 3 MIL-rugged. The 8560 EC Series is identical to the 8560E Series in all other respects.

Frequency Specifications, Agilent 8560 EC Series

Unless noted, all specifications describe the instrument's warranted performance under the following conditions: 5-minute warm-up from ambient conditions, autocoupled controls, digital display, IF ADJ ON, REF LVL CAL adjusted, SECOND IF OUTPUT and 1ST LO OUTPUT terminated in 50 Ω . After a 30-minute warm-up, and over a temperature range of 20 °C to 30 °C, the preselector does not have to be peaked at each signal of interest; under these conditions factory preselector peak values are sufficient to meet all specifications. Typical performance is non-warranted. Supplemental characteristics are denoted by "nominal" and "approximately"; these constitute non-warranted functional performance information derived during the design process and are not tested on a continuing basis.

^{1.} Agilent 8563EC, 8564EC, 8565EC require Option 856xEC-006 for operation below 9 kHz.

- 4. After 7 day warm-up
- 5. N = harmonic mixing mode number

^{2.} Agilent 8560EC, 8561EC, 8562EC minimum frequency in AC coupled mode is 100 kHz . In DC coupled mode minimum frequency is 30 Hz.

^{3.} -10 °C to +55 °C, referenced to 25 °C

^{6.} Frequency reference accuracy = aging x time since last adjustment + initial achievable accuracy + temperature stability

^{7.} Short term warmup accuracy factors have been included in this calculation.

Agilent Technologies' Test and Measurement Support, Services, and Assistance

Agilent Technologies aims to maximize the value you receive, while minimizing your risk and problems. We strive to ensure that you get the test and measurement capabilities you paid for and obtain the support you need. Our extensive support resources and services can help you choose the right Agilent products for your applications and apply them successfully. Every instrument and system we sell has a global warranty. Support is available for at least five years beyond the production life of the product. Two concepts underlie Agilent's overall support policy: "Our Promise" and "Your Advantage."

Our Promise

Our Promise means your Agilent test and measurement equipment will meet its advertised performance and functionality. When you are choosing new equipment, we will help you with product information, including realistic performance specifications and practical recommendations from experienced test engineers. When you use Agilent equipment, we can verify that it works properly, help with product operation, and provide basic measurement assistance for the use of specified capabilities, at no extra cost upon request. Many self-help tools are available.

Your Advantage

Your Advantage means that Agilent offers a wide range of additional expert test and measurement services, which you can purchase according to your unique technical and business needs. Solve problems efficiently and gain a competitive edge by contracting with us for calibration, extra-cost upgrades, out-of-warranty repairs, and onsite education and training, as well as design, system integration, project management, and other professional engineering services. Experienced Agilent engineers and technicians worldwide can help you maximize your productivity, optimize the return on investment of your Agilent instruments and systems, and obtain dependable measurement accuracy for the life of those products.

www.agilent.com/find/emailupdates Get the latest information on the products and applications you select.

Agilent T&M Software and Connectivity

Agilent's Test and Measurement software and connectivity products, solutions and developer network allows you to take time out of connecting your instruments to your computer with tools based on PC standards, so you can focus on your tasks, not on your connections. Visit **www.agilent.com/find/connectivity** for more information. For more information on Agilent Technologies' products, applications or services, please contact your local Agilent office.
