

AXS-100 Series

NETWORK TESTING—OPTICAL

Compact, rugged, lightweight OTDRs optimized for access/FTTx and LAN/WAN network testing

- A single unit for testing singlemode as well as 50 and 62.5 μm multimode fiber
- 850, 1300, 1310 and 1550 nm wavelengths, with respective dynamic ranges of 24, 25, 32 and 30 dB
- Unrivalled event dead zone of 0.8 m, for easy location and characterization of all events
- Top user-friendliness: one-touch testing, summary screen, macrobend finding
- Complete connectivity flexibility: USB stick compatibility and USB cable data download
- Complete test set with value-added options, including power meter, visual fault locator (VFL), fiber inspection probe, printer and IP testing

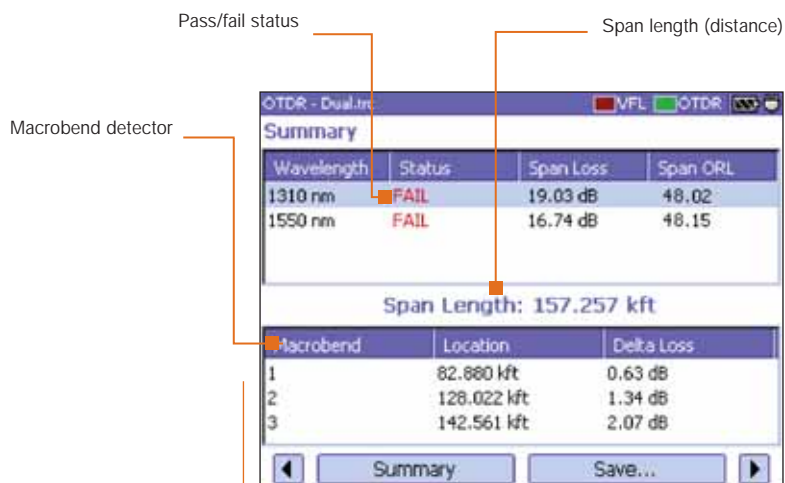

AXS-100 Series: Four Models to Choose From

EXFO's AXS-100 Handheld OTDR series covers the whole range of short-haul OTDR test applications. Featuring unrivaled event dead zones and first-class dynamic ranges, it includes four models to better suit your specific OTDR testing requirements.

MODEL	WAVELENGTHS	DYNAMIC RANGES
AXS-100 Access OTDR Designed for singlemode OTDR troubleshooting (in-service PON troubleshooting option)	1310/1550/1625 nm	29/28/28 dB
AXS-110-SM Singlemode OTDR Ideal for FTTx/access and CATV testing	1310/1550 nm	32/30 dB
AXS-110-MM Multimode OTDR Optimized for enterprise/premises/private network testing on both 50 and 62.5 μ m multimode fiber	850/1300 nm	24/25 dB
AXS-110 All-Fiber OTDR Combines singlemode and multimode capabilities for enterprise/campus/access networks	850/1300/1310/1550 nm	24/25/32/30 dB

UNIQUE ADVANTAGES

- FasTrace function: one-touch testing for top user-friendliness
- 8-hour power autonomy
- Lightweight: 1 kg
- USB port (memory-stick compatible) for easy data transfer
- Large internal memory (up to 500 results)
- Transflective color display for viewing clear results under bright sunlight
- Superior automated analysis for a better, easier and faster diagnosis
- Automatic pass/fail analysis and macrobend locating
- Auto-zoom on events

The AXS-100's unique software functionalities provides in-depth results at a glance.

The AXS-110 OTDR: the LAN/WAN Test Solution

EASY LOCATION AND CHARACTERIZATION OF EVENTS

The AXS-110 OTDR models help you boost test productivity for inside-plant applications. Its exceptional 0.8 m event dead zone enables you to easily locate and characterize all events between the transmitter and the central office's fiber, access and FTTH network applications, where events are usually closely spaced.

MULTIMODE AND SINGLEMODE FLEXIBILITY

The AXS-110 All-Fiber OTDR combines singlemode and multimode functionalities, ideal for premises/private/enterprise network testing. Test multimode fiber within premises, or singlemode fiber between premises—all with a single OTDR unit—and maximize your return on investment.

END-TO-END PON CHARACTERIZATION

The AXS-110 OTDR models let you test through high-port-count splitters—even 1 x 32 splitters—perfect for passive optical network (PON) testing.

AXS-110 ALL-FIBER OTDR: KEY ADVANTAGES

- Perfect tool for tier-2 certification of premises networks
- Pass/fail features that comply with industry standards such as TIA 568c and IEEE 802.3ah
- Highest dynamic range of the industry for a handheld OTDR
- Power meter option, for crosschecking the total loss using the built-in OTDR laser in continuous source mode

The AXS-100 Access OTDR: the Definitive Troubleshooting OTDR

EXFO's AXS-100 Access OTDR combines the industry's leading OTDR technology with power meter functionalities in one powerful handheld unit. Optimized for point-to-point testing of passive optical networks (PON) within FTTx architectures, it offers several wavelength configurations and a wide range of options, for first-class flexibility.

IN-SERVICE PON TROUBLESHOOTING OPTION

The AXS-100 Access OTDR is specifically designed for in-service PON troubleshooting. It features an optional dedicated port for testing at 1625 nm incorporating a filter that rejects all unwanted signals (1310, 1490 and 1550 nm) that could contaminate the OTDR measurement. The filter only lets through the 1625 nm OTDR signal, ensuring accurate OTDR measurements.

In-service OTDR troubleshooting of optical fiber does not interfere with the normal operation and expected performance of the information channels. EXFO's AXS-100 does not interfere with the CO's laser transmitters, as it uses an out-of-band wavelength, as per the ITU-T L.41 recommendation ("Maintenance Wavelength on Fibers Carrying Signals").

Unique Trace Analysis Software Features, for Fast, Reliable Results

AXS-100 series OTDRs make link assessment a fast, simple task, providing unparalleled ease of use, even for technicians with little background in optical/OTDR testing. Designed for boosting OTDR testing efficiency, whether for multimode or singlemode applications, the AXS-100 software offers:

- Full access to OTDR traces from major test equipment manufacturers**
 Based on the universal Bellcore format (.sor, Telcordia SR-4731), the software lets you access OTDR traces from various test and measurement manufacturers. You can therefore seamlessly switch to the AXS-100 series and still refer to your previously archived OTDR files.
- Summary screen**
 View all your test results at once. Enjoy fail-safe OTDR post-analysis.
- Faster acquisition—five seconds**
 Spend less time retrieving your OTDR traces, speeding up your test cycles.
- Best-in-class software analysis**
 EXFO's leading expertise in OTDR testing and trace analysis lets you benefit from high-end software in a handheld unit. Focus on what's real: generate a list of all events actually present on the link.
- Auto-zoom on events**
 Automatically toggle between events, and get an instant zoom on an event along with its markers.

Wavelength	Status	Span Loss	Span ORL
1310 nm	FAIL	19.03 dB	48.02
1550 nm	FAIL	16.74 dB	48.15

Span Length: 157.257 kft

Macro Bend	Location	Delta Loss
1	82.880 kft	0.63 dB
2	128.022 kft	1.34 dB
3	142.561 kft	2.07 dB

Buttons: Summary, Save...

SIMPLE AS 1-2-3

The Fiber Technician's Complete Test Set—Value-Added Options

IP TESTING

Performing complete access network testing also means testing the delivered service. With the AXS-100's IP testing option, you can perform basic IP verification that will facilitate future troubleshooting operations.

VISUAL FAULT LOCATOR

Ideal for easily identifying macrobends, bad splices or bad connectors, this option delivers built-in 650 nm visual fault location on a universal connector.

POWER METER GeX

The AXS-100's optional power meter covers the 800 to 1650 nm range, offering a power range of -60 to 26 dBm (GeX 2 mm); it is also calibrated according to CWDM wavelengths. The optional power meter comes with a three-year recommended calibration interval, providing for a very low cost of ownership.

SmartKit SOFTWARE

Save time on the field with automated software analysis functions. Let the instrument work for you. This software package combines automatic macrobend detection, pass/fail and fault finding features. It enables you to access all your results at once and easily check link status. A single summary screen shows you detailed pass/fail status, fiber-length measurements and pinpoint macrobend localization.

FIBER INSPECTION PROBE

In any optical network, connectors should be kept clean and in good condition—which is not always easy in outside conditions. You can quickly and easily inspect fiber ends or connectors using a fiber inspection probe, and view the endfaces on the AXS-100's high-resolution display. Then, save your image captures for future documentation purposes.

View fiber ends and connector endfaces on the AXS-100's high-resolution display.

Flexible Connectivity

Fast-Track Data Post-Processing with FastReporter Software

The optional FastReporter software package provides you with the post-processing tools and functionalities you need to meet such challenges, whatever the application. Designed for **off-line analysis of field-acquired data**, FastReporter offers a truly intuitive graphical user interface, which contributes to boosting productivity.

POWERFUL BATCH PROCESSING

Automate repetitive operations on large numbers of OTDR test files, and optimize your productivity. Document an entire cable in a matter of seconds. Adjust your cable parameters and detection thresholds and perform batch analysis. Open OTDR files from various vendors' equipment and convert them to the universal Telcordia format.

BIDIRECTIONAL BATCH ANALYSIS

Analyze an entire cable in just two steps. View data for all events on all fibers, and at each wavelength, on a single screen.

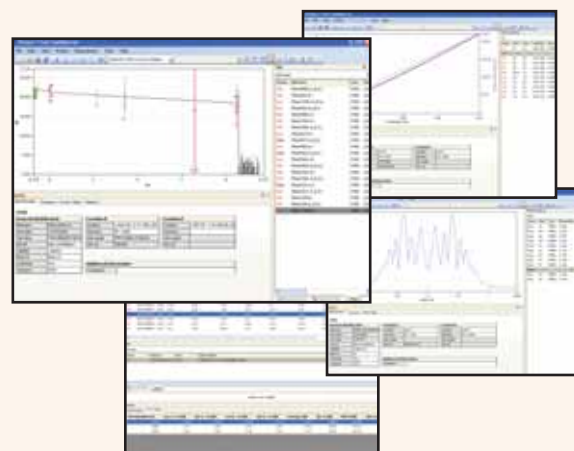

Bidirectionnal Batch Analysis

LIVE TEMPLATING FOR OTDR TESTING

Benefit from one-step file management at any wavelength. Keep full control by adding or removing events manually, or add/remove events automatically using a reference. Get uniform, detailed cable reports.

FLEXIBLE REPORTING

Choose from various report templates, including loss and ORL, OTDR, PMD, CD and fiber characterization. Generate comprehensive cable reports in PDF, Excel or HTML format.

TIME SAVERS FROM EXFO'S OTDR VIEWER SOFTWARE

This free software brings you key data post-processing features such as:

- **Pass/warning/fail threshold setup**, which helps you meet ribbon and multifiber validation specifications
- **Bidirectional trace analysis**, which provides more accurate, averaged loss measurements for each event
- **Multifiber testing** using the Template Trace mode, which dynamically compares new OTDR results with a trace you assign as a reference

SPECIFICATIONS ^a	AXS-100	AXS-110
Wavelength (nm)	1310/1550/1625	850/1300/1310/1550
Dynamic range ^b (dB)	29/28/28 (1310/1550/1625)	24/25/32/30 (850/1300/1310/1550)
Pulse width (ns)	10, 30, 100, 275, 1000, 2500, 10 000	Multimode: 5, 10, 30, 100, 275, 1000 Singlemode: 5, 10, 30, 100, 275, 1000, 2500, 10 000
Event dead zone ^c (m)	2.5	0.8
Attenuation dead zone ^c (m)	11/12/12	3.5/4.5/4.5
Launch conditions ^d		Class CPR 1 or 2
Linearity (dB/dB)	± 0.05	± 0.03
Loss threshold (dB)	0.05	0.01
Loss resolution (dB)	0.01	0.01
Sampling resolution (m)	0.16 to 5	Multimode: 0.08 to 2.5 Singlemode: 0.08 to 5.0
Sampling points	Up to 30 000	Up to 64 000
Distance uncertainty ^e (m)	± (1 + 0.005 % x distance + sampling resolution)	± (0.75 + 0.0025 % x distance + sampling resolution)
Distance range (km)	0.65 to 160	Multimode: 0.1 to 40 Singlemode: 0.65 to 260
Typical real-time refresh (Hz)	2	4
Memory capacity	500 traces	500 traces
Measurement time	User-defined	User-defined
Stable source output power ^f (dBm)	-9	Multimode: -1.5 Singlemode: -6.5
Visual fault locator (optional)	Laser, 650 nm ± 10 nm CW Typical P _{out} in 62.5/125 µm: 3 dBm (2 mW)	Laser, 650 nm ± 10 nm CW Typical P _{out} in 62.5/125 µm: 3 dBm (2 mW)

OPTIONAL POWER METER ^g

Calibrated wavelengths (nm)	850, 1270, 1290, 1310, 1330, 1350, 1370, 1390, 1410, 1430, 1450, 1470, 1490, 1510, 1530, 1550, 1570, 1590, 1610, 1625
Power range (dBm)	26 to -64 (GeX 2 mm)
Uncertainty	± 5 % ± 0.4 nW (up to 5 dBm)
Display resolution (dB)	0.01 (-54 dBm to P _{max}) 0.1 (-54 dBm to -64 dBm) 1 (-64 dBm to min)
Automatic offset nulling range ^h	Maximum power to -38 dBm

GENERAL SPECIFICATIONS

Size (H x W x D)	250 mm x 125 mm x 75 mm (9 7/8 in x 4 15/16 in x 3 in)
Weight	1 kg (2.2 lb)
Temperature	operating: -18 °C to 50 °C (14 °F to 122 °F) storage: -40 °C to 70 °C (-40 °F to 158 °F)
Relative humidity	0 % to 95 % non-condensing
Power	Li-ion batteries 8 hours of continuous operation as per Bellcore TR-NWT-001138
Warranty (years)	1

Notes

- All specifications valid at 23 °C ± 2 °C (73.4 °F ± 3.6 °F) with an FC/PC connector, unless otherwise specified.
- Typical dynamic range with longest pulse and three-minute averaging at SNR = 1. Multimode dynamic range is specified for 62.5 µm fiber; a 3 dB reduction is seen when testing 50 µm fiber.
- Typical dead zone for multimode reflectance below -35 dB and singlemode reflectance below -45 dB, using shortest pulse.
- For multimode port, controlled launch conditions allow 50 µm and 62.5 µm multimode fiber testing.
- Does not include uncertainty due to fiber index.
- Typical output power is given at 1300 nm for multimode output and 1550 nm for singlemode output.
- At 23 °C ± 1 °C, 1550 nm and with FC connector. With OTDR in idle mode, battery operated.
- For ± 0.05 dB, from 18 °C to 28 °C.

LASER SAFETY

21 CFR 1040.10 AND IEC 60825-1:1993+A2:2001
