## **BFA FIBRE ADAPTERS**

# BFA Series

### The BFA-3000 Universal Bare Fiber Adapter

The BFA-3000 is an essential accessory for performing fast, accurate and repeatable power measurements on non-connectorized fiber or components. Its innovative, spring-loaded mechanism enables easy, consistent positioning of bare fibers for connection to a power meter via the FOA-3000 Adapter. This bare fiber adapter is perfect for repeatable power measurements using EXFO's OHS-1713-UH Ultra-High-Power<sup>™</sup> Optical Head.

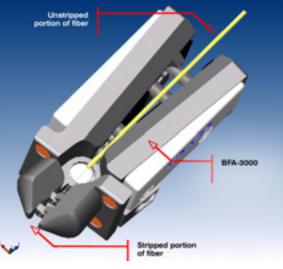

Whether in an R&D setup or a manufacturing environment, the BFA-3000 complements EXFO's IQS-1500, PM-1600, IQS-1600, IQS-1700 and OHS-1700 power meters (detectors  $\geq$  3 mm), as well as the detectors used in the IQS-12001B Cable Assembly Test System.

#### BFA-200 Series Bare Fiber Adapters

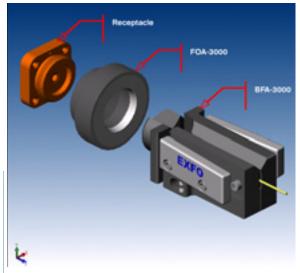

These adapaters easily and quickly connect bare fibers, thanks to their push-button locking system. Designed for both field applications and component testing, they ensure reliable connections and are the ideal complement to EXFO's complete range of fiber-optic test instruments. BFA-200 series adapters are available for FC, SC, ST and E-2000 connectors.

- Designed for singlemode or multimode fiber, both coated or non-coated, bare fiber or non connectorized components
- Easy fiber positioning
- Repeatable measurements, from test to test, from user to user

BFA-3000 in open position. Fiber is in place. Yellow portion of fiber is unstripped.

BFA-3000, FOA-3000 and receptacle assembly.
