

JDSU OLP-6 Specs

Provided by www.AAAtesters.com OLP-5, OLP-6 and OLP-8 Optical Power Meters

Pocket-sized optical power meters

Key features

- · Pocket class: Rugged, compact and lightweight
- Easy-to-use, straight forward operation
- Reliable basic functionality for most economical testing
- Three year calibration period
- Dedicated for all single mode and multi-mode applications like LAN, Telecom, CATV, and DWDM testing
- Universal push pull interface (2.5 or 1.25 mm)
- Twintest and Auto-λ
- · Compact design, versatile use
- Standard AA batteries or NiMH/NiCd cells

Basic, reliable, economic solution

The JDSU OLP-5, OLP-6 and OLP-8 are handy, pocket-sized optical power meters for quick, easy and convenient field measurement of optical power and attenuation in fiber networks. They can be used on their own for simple output tests, or with a light source for insertion loss measurements. The full functionality of the pocket-sized OLP range is realized when used with an JDSU optical light source (OLS).

Accurate measurement, simple operation

Three-button operation and a bright, clear display make the pocket-sized OLPs very easy-to-use. The reference level for the attenuation measurement is made to IEC-874-1 (method 6) and can be saved with a single keystroke.

Used with an JDSU OLS light source, the possibility of measurement errors is eliminated because the power meter automatically detects the wavelength being transmitted. As a result, dual wavelength measurements at 850 and 1300 nm or 1310 and 1550 nm can be made quickly and easily, using the saved reference levels.

Automatic identification of individual fibers

Pocket-sized OLPs can be used with an JDSU light source to detect the modulation frequency of the light coupled into the fiber, for identification purposes.

Different power ranges for different applications

There are three OLPs available with different power ranges. The **OLP-5** is dedicated to LAN/multimode or single mode applications. The **OLP-6** covers mostly the standard telecom applications, while the **OLP-8** is dedicated to higher power applications like CATV networks, DWDM systems and EDFA testing.

Rugged field instrumentation

The instruments, which all take standard AA (Mignon) batteries or rechargeable batteries, are supplied in a robust case with a handy belt bag. The selectable on/off power-down shuts off automatically after 20 minutes. Whenever the on/off key is pressed the remaining battery capacity is displayed. Operating time is further maximized by the use of low-power components.

Universal push pull interface

With the UPP (2.5 or 1.25 mm) you can connect every optical connector without changing any adapter.

OMK-5/6/7: available as test kits together with a power meter and accessories

 $Quick \, charger \, for \, NiMH \, or \, NiCd \, cells \, (accessory)$

OVF-1 Visual Fault Locator (accessory)

Specifications

OLP-5 BN 2256/01

Display range -60 to +5 dBm Max. permitted input level +10 dBm

Accuracy

Wavelength and modulation detection together

with OLS-5, OLS-6, OLS-55/56,

OLT-55 270 Hz, 330 Hz, 1 kHz, 2 kHz 1300, 1310, 1550 nm -50 to +5 dBm 850 nm -45 to +5 dBm

Connectable

fiber types

fiber types 9/125 to 100/140 μm

OLP-6 BN 2256/02

Display range -65 to +10 dBm Max. permitted input level +10 dBm Accuracy Intrinsic uncertainty⁽¹⁾ ± 0.20 dB (± 5%) Linearity(2) \pm 0.06 dB (-50 to +5 dBm) Wavelength range 780 to 1650 nm Standard wavelength settings 850, 1300, 1310, 1490, 1550 nm Wavelength and modulation detection together with OLS-5, OLS-6, OLS-55/56, 270 Hz, 330 Hz, 1 kHz, 2 kHz OLT-55 1300, 1310, 1490, 1550 nm −50 to +10 dBm 850 nm -45 to +10 dBm Connectable

9/125 to 100/140 µm

OLP-8 BN 2256/03

Display range -50 to +23 dBm Max. permitted input level +23 dBm

Accuracy⁽¹⁾

 $\begin{array}{ll} \text{Intrinsic uncertainty}^{(3)} & \pm 0.20 \text{ dB} \ (\pm 5\%) \\ \text{Linearity}^{(2)} & \pm 0.06 \text{ dB} \ (-35 \text{ to} + 20 \text{ dBm}) \\ \text{Wavelength range} & 780 \text{ to} 1650 \text{ nm} \\ \text{Standard wavelength settings} & 980, 1310, \\ & 1480, 1550 \text{ nm} \end{array}$

Wavelength and modulation detection together with OLS-5, OLS-6, OLS-55/56, OLT-55 270 Hz, 330 Hz, 1 kHz, 2 kHz 1310, 1550 nm -35 to +23 dBm 980 nm -30 to +23 dBm Connectable

fiber types 9/125 μm to 10/125 μm

- (1) Under reference conditions: -20 dBm (CW), 1310 nm, ±2 nm, 23°C ±3 K, 40 up to 75% relative humidity.
- (2) Temperature range 23°C \pm 3 K, 9/125 μm fiber + PC connector, 40 up to 75% relative humidity.
- (3) While using APC connector, additional uncertainty of -0.1 dB may occur.

Optical interface

Standard:	Universal Push-Pull (UPP) 2.5 mm adapter
	Matches DIN, ST, FC, SC,
	E2000 flat or angled face plugs
Optional:	UPP 1.25 mm (F3000, LC)
Photo diode ty	oe Germanium
Display	LCD, 4-digit
Result display i	n dBm, dB
Resolution	0.01 dB,
below -60 dBm	0.1 dB
Modulation de	ection 270 Hz, 330 Hz,
	1 kHz, 2 kHz
Wavelength de	tection "on" (Auto-λ) "AU"
Permanent mo	de "PERM"
Battery charge	
when switching	g on/off

Reference level

Reference level stored for each wavelength

Operating time

from dry batteries typical 130 h

Power supply

Dry batteries $2 \times Mignon (AA) 1.5 V$ or NiCd/NiMH cells $2 \times Mignon (AA) 1.2 V$

Discharge protection

for batteries/NiCd cells Automatic

power down after approx. 20 minutes to conserve battery power (function can be disabled)

Electromagnetic compatibility

Corresponds to EN 50081-1 and EN 500082-1 (CE conformance)

Recommended calibration interval 3 years Ambient temperature

Nominal range use $-10 \,^{\circ}\text{C}$ to $+50 \,^{\circ}\text{C}$ Storage and transport $-40 \,^{\circ}\text{C}$ to $+70 \,^{\circ}\text{C}$ Dimensions $(w \times h \times d)$ approx. $73 \times 28 \times 140 \,\text{mm}$ Weight approx. $180 \,^{\circ}\text{Q}$

Ordering information

BN 2256/01	OLP-5 $(-60\ to\ +5\ dBm)$ Included with the OLP-5 are two dry batteries Mignon AA 1.5 V, operating manual; belt bag
BN 2256/02	OLP-6 $(-65\ to\ +10\ dBm)$ OLP-6 comes complete with two dry batteries Mignon AA 1.5 V, operating manual, belt bag
BN 2256/03	JDSU OLP-8 (–50 to +23 dBm) OLP-8 comes complete with two dry batteries Mignon AA 1.5 V, operating manual, belt bag
