

video inspection probe

VIP-35

Description

The VIP Inspection Probe is designed to provide customers the ability to troubleshoot network performance issues (most commonly caused by dirty connectors) by inspecting the endface of a connector for debris.

The probe offers the combination of value and performance in an easy to use, compact, hand-held package. With the included complement of tips, the user has the ability to check the quality of both the cable and inside bulkhead connectors.

The VIP-35 kit includes a 400x probe, 3.5 inch display and a hard case.

Common connector and bulkhead adapters for 2.5mm and 1.25mm are included with the kits and additional adapters are available for almost all fiber connector styles.

Specifications:

	VIP-35
