Trilithic 360 DSP Specs

Provided by www.AAATesters.com

Next Generation Certification Meter

- Advanced Home Certification Capabilities Simplify Installation and Troubleshooting
- Intuitive Color Touch Screen with Simple Pass/Fail Indicators Reduce Installer Entry Errors and Improves Decision Making
- Next-Generation Autotest Apps Streamline Certification
- Convenient Multiple Standard Tests in a Single Autotest App help to Standardize Tech Processes & Procedures
- Powerful Troubleshooting Tools Improve the Overall Health of the System

The precision of a field analyzer with the power of a smart device.

The Standardization Solution

Trilithic's 360 DSP[™] is the first meter designed specifically to simplify Home Certifications. Built from the ground up, tailored specifically for the needs of fulfillment, this meter is ideal for standardizing processes and procedures for installation and troubleshooting — and includes a price point that makes it feasible for system operators to outfit their entire fleet.

Tailored for the challenges faced by installers, contractors and service techs, this go-to next-gen meter comes equipped with all of the powerful troubleshooting tools for the advanced tech, yet helps simplify decision making and streamline standard processes and procedures for the more novice tech. This improves tech efficiencies, the overall health of the entire system and allows techs to grow with the meter.

Next Gen Features

The 360 DSP features an intuitive color touch screen interface, simple pass/ fail indicators, and simple apps to streamline certification and make the installer's job easier.

Everything about this next-gen meter was built with the technician in mind, from the longest battery life and quickest charge time of any installation meter to its unique built-in LED flashlight and glow in the dark keypad for those dark cramped spaces.

Including next-generation smart device technology the 360 DSP is virtually the easiest, most feature-rich, bestperforming installation meter available today.

Comprehensive Testing

The 360 DSP makes Home Certification a breeze for technicians at all levels including installation, service, and contractor. Techs will appreciate the advantages of a quick and efficient device at their disposal that features a flexible and easy-to-operate interface that is inspired by modern smart devices.

This next gen fulfillment tool comes equipped with powerful troubleshooting tools and simplified Autotest Apps to perform triple play tests, set Home Certifications standards and measure both Analog and Digital signals. With its built-in CableLabs Certified DOCSIS 3.0 (8x4) Modem, Ethernet and Wi-Fi communications capabilities, all testing results can be easily forwarded to ViewPoint in the back office in near real-time.

360 DSP Next Generation Certification Meter

STANDARD TESTING FEATURES:

- Upstream Return Spectrum Analysis (4 to 110 MHz)
- Level Mode
- C/N Measurement
- QAM mode (MER/BER/ Constellation/EQ)
- Complete Channel Plan Scan with Tilt Measurement
- DOCSIS 3.0 modem 8x4 (100/304 MBPS)
- RJ-45 (10/100MBPS)
- Wi-Fi "b/g" 2.4 GHz
- Cable Modem Statistics
- Built-in CM to RJ-45 Mode
- Network Test Suite, includes Thru-put, VoIP, Ping, and Trace Route

OPTIONAL FEATURES COMING SOON:

- Linear Distortions Test Suite
- Frequency Domain Reflectometer

The 360 DSP supports a variety of functions, including:

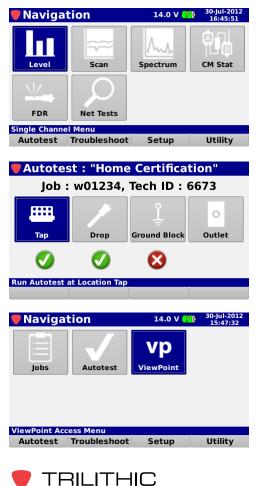

- Multi-user support
- Multi-language support
- Create work orders right on the meter
- Built-in web browser, real-time data transmission
- Interactive home certification process

Simple Yet Powerful

Providing the widest range of functions for an installer available today (as standard options), the 360 DSP includes virtually all the testing options an installer or service technician needs to verify service quality and easily identify and fix problems in the field. Standard tests for analog or digital video and triple play include Level mode, C/N measurement, MER/BER and Constellation, Scan and Tilt, Wi-Fi, cable modem stats and a network test suite that includes Thru-Put, VoIP, PING and Trace Route. Optional features include a Frequency Domain Reflectometer and the Linear Distortions Test Suite.

Combining simplified Autotest Apps and powerful troubleshooting tools the 360 DSP allows technicians both novice and advanced can grow with their meters and use the features they need. Utilizing DSP technology, the 360 DSP also allows for easy expansion with optional advanced features offered typically as simple license activation codes, no hardware upgrades or return to the factory for upgrade.

Trilithic also makes it even easier to obtain consistent, repeatable results by integrating with backoffice solution ViewPoint, giving supervisors that birds-eye view of the field for total Home Certification management.

STANDARD FEATURES

The 360 DSP includes all of the following features standard.

Multiple User Profiles

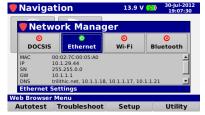

- Allows up to 5 technicians to share a 360 DSP
- Each technician has his or her own profile, which loads in completely different sets of channel plans, autotest, etc.

Welcome to the 360 DSP

Next Generation Certification Meter

INCLUDED MEASUREMENT FUNCTIONS

The 360 DSP includes all of the following measurement functions standard.

Analog Level Measurement

Digital Level Measurement

Shows the level, ME and BER of a QAM channel

Users can change the
display to view BER over
time, Equalizer Tap and
Constellation

ER	Vevel		
	Ref 10 dBmV 10 dB/Div	CH 120	Arris
	10	CH 120	DIG: 771.000 MHz
	0	Pass	BW: 6.000 MHz
	-10	rass	64 QAM Annex B
he	-30		SR: 5.056941 MSPS
	-40	Level	12.1 dBmV 🔇
over	-60	Pre BER	1.00E-08 🧭
and	-70 -80	Post BER	1.00E-08 🧭
	Digital	MER	37.5 dB 🔣
	Set the Channel Numbe	r	Normal
	Display Channel	Plan Limit Se	at

Equallizer Tap Display

- Displays the equalizer stress and whether the DOCSIS specification is being broken
- Allows the user to place a marker on a tap to display the distance to the tap

Return Spectrum Measurement

- Provides the ability to view raw return spectrum traces from 4 to 110 MHz
- Fast DSP spectrum snapshots give the user extreme speed to capture fast transients on the upstream

🛡 Return	Spectrum		
Ref -6 dBmV	Maximum	Pass	10 dB/Div
/M/	n <u>m n</u>

360 DSP Next Generation Certification Meter

Total Home Certification Management

Combining 360 DSPs in the field with the new ViewPoint WFM Module in the back office, managers now have simplified access to intelligent management tools for monitoring, assessing and improving the efficiency of their total home certification operation.

By unifying an entire MSO's field operations in one convenient dashboard, managers can easily verify installation compliance and quality throughout the entire plant, either by home, system, region, division or any other attribute from a billing system.

This simple and completely customizable integrated system of field analysis and reporting tools allows managers to watch over their entire field operations in one convenient dashboard that compares each location in the system, analyzes the overall health of their entire organization and addresses concerns in near real-time. (See the ViewPoint WFM Module datasheet for more information).

Autotest Apps

The 360 DSP features next generation autotest applications that practically walk the technician through a job. By performing standardized measurement tests at various required locations on the job site using user set test plans, channel plans and limit sets, the meter very clearly indicates (using color and symbols) what areas still need attention, before the technician leaves the job site.

Multi-user support allows technicians that work in various territories to easily switch channel plans and standardized autotest apps and test limits or login as a completely different user.

The built-in web browser allows techs to upload job data in near real-time as well as transmit and receive channel plans, autotests, work orders and firmware. Leaving less room for entry error, this new simple user interface can translate into less training and more efficient time in the field for techs. Although the 360 DSP comes equipped with all of the required troubleshooting tools for the advanced technician, it also offers a higher comfort factor for novice technicians, reducing decision making in the field, which can ultimately result in more productive work days and more satisfied customers.

Justify ROI

Field operations managers can now easily verify that all of their technicians are performing the proper tests and are doing so at the right place and time—in near-real time. The potential benefits include identifying techs who need additional training, improving team performance, reducing truck rolls and cutting operating costs could obviously be significant.

At a higher level ViewPoint can deliver simple, standardized, system-wide reports and dashboards that can help a director or VP of technical operations view the entire operation at a glance to gain information that can be used to reduce service and repeat trouble calls.

Essentially, this integrated system approach allows cable operators to see much more of their home certification operations and use the information in practical ways. The insights can enable them to identify both localized problems and highlevel system issues to make decisions based on a clearer understanding of their overall operations and the associated ROI.

Combining 360 DSPs in the field with the new ViewPoint WFM Module in the back office, managers can view the health of their entire system-- in near real-time, for total Home Certification management.

SPECIFICATIONS

Seneral Specifications	
Control	Glow in the dark keypad and LCD touch screen and/or via a wireless connection to a mobile device such as a laptop, tablet, iPad [®] or iPhone [®] , or Android [®] handset
Display	Color LCD touch screen; 480 x 272 pixels (approx 4" x 2.25")
Annunciators	Audible annunciator for key strokes
Communications	DOCSIS 3.0 Modem (8x4), Bluetooth (optional USB plug in), USB A, Ethernet (10/100), and Wi-Fi 802.11 b/g (optional)
leasurement Specification	ns
Forward Frequency Tuning Range	50 - 1003 MHz
Reverse Frequency Tuning Range	4 - 110 MHz
Amplitude	Analog: 40 dBmV to +50 dBmV
Measurement Range	Digital: -40 dBmV to +50 dBmV
Return	< -40 dBmV (Ground Block Test)
IF Bandwidth	6 MHz standard, 8 MHz optional
Deep Interleave Compatibility	Yes
Carrier-to-Noise	As per FCC Part 76.605. Carrier and Noise both measured in same analog channel => 50 dB
Downstream MER	34 dB for => -6 dBmV RF level,
	typical: 40 dB for => +6 dBmV RF level
Downstream BER	True BER (derived from code words not from MER)
	Range: 1 E-7 to 1 E-9 for signal => -6 dBmV
	ITU J.83 annex A, B, C
lechanical Specifications	
Construction	Rubber overmolded plastic housing
Antenna	Internal Wi-Fi antenna, 2 dB gain
Flashlight	High intensity LED (0.25W)
Operating Time	8 to 10 hours, dependant on use
Charge Time	3 hours
Battery	Twin 2600 mAh @ 7.2V Li-Ion internal, factory replaceable
Power Adapter	Input: 100 to 240 VAC ~ 47 to 63 Hz, 1.1A Max Output: 15 VDC, 3.3A
Operating Temperature Range	-18° to +50° C (0° to 122° F)
Dimensions (H x W x D)	w/o Case: 8.0 x 5.5 x 2.0 in (20.32 x 13.97 x 5.08 cm) w/ Case: 9.0 x 6.5 x 3.0 in (22.86 x 16.51 x 7.62 cm)
Weight	2 lbs (907 grams)

INCLUDES THE FOLLOWING:

360 DSP Meter	
Protective carrying case	
Shoulder strap	
AC to DC Power Adapter & Batte Charger	ry
Touchscreen Stylus
